

SUSTAINABLE DEVELOPEMENT POLICY OF SPA GRAND PRIX

SPA GRAND PRIX is the promoter of the Formula 1 Belgian Grand Prix, taking place on the Spa-Francorchamps circuit. With its mission, SPA GRAND PRIX contributes to the influence and attractiveness of the Region and its inhabitants. SPA GRAND PRIX is above all a public tool, for the exclusive benefit of the community: the economic spin-offs of the organization of the Grand Prix on the Region are estimated annually at 42 million euros.

Within the framework of its mission, SPA GRAND PRIX integrates in each of its actions and decisions the values of transparency, rigor, proximity, accessibility, innovation, heritage. As well as the sustainable development principles of inclusion, transparency, integrity, and vigilance.

SPA GRAND PRIX's certification perimeter concerns all the activities linked to the production and marketing of the event, including the professional and public reception sites.

Aware of the stakes of sustainable development inherent to the sector of the event and anxious to go further in its current approach, SPA GRAND PRIX engages in a deep approach of sustainable development, with the objective, on the one hand to mobilize itself, and on the other hand, to promote this approach to its subcontractors and spectators.

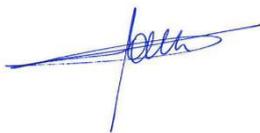

This SD approach is based on the following priority issues:

- Limiting the environmental impact of the event:
 - o Limiting and reducing single-use consumption
 - o Ensuring the sorting and management of waste
 - o Controlling and acting to limit the carbon impact of transportation
- Making the event a lever for responsible economic development:
 - o Promoting economic spin-offs on the territory
 - o Participating in the influence of local actors
 - o Developing a responsible purchasing policy
- Acting to create a positive social impact
 - o Ensuring the inclusion, accessibility and satisfaction of event participants
 - o Ensuring optimal working conditions and safety of employees

Within a controlled and reasonable budget, SPA GRAND PRIX, through its direction, is committed to:

- Meeting the legal and regulatory requirements applicable to it
- Meeting the requirements of the ISO 20121 standard
- Taking into account, through regular dialogue, the needs and expectations of its stakeholders
- Mobilizing its stakeholders and working on a positive social, environmental, and economic legacy
- Strengthening its policy of continuous improvement.
